**Subject:** Meeting with Miller Chemical and Fertilizer 6/10/15 @ 10:00 AM

All,

I have had several long discussions with Miller and their consultants this evening. They are amenable and quite frankly want, a meeting with the Department to look at long term impacts and cleanup. Their insurance companies will be at their site tomorrow morning. They would prefer to have an onsite meeting at their facility, I personally feel that this is a good idea to see the site and understand what is actually going on however I do not know everyone's schedule and a conference call will work as well. Also, in the meeting or call will be Adams County EMA staff and the EPA On Scene Coordinators office. It takes about an hour to get to the facility so we would need to leave at approximately 9-9:15.

If everyone could get their preference back to me as to how they would like to meet, onsite or conference call, I would be appreciative. The indication I got from Miller and their consultant was positive as far as removing the contamination from the swale. Of note to SDW they did ask us to work with NOMA to get an estimate on trucking water if they needed to do that, I would take that as a positive sign, at least until they have an understanding of the cost. Another positive note is that they do have insurance to cover environmental damages and the consultant will be part of the meeting tomorrow.

If anyone would like to discuss anything further tonight please give me a call on my cell at 717-571-9837

Thanks

**Brian L. Moore** | Manager
